

redefining PORTABLE MODULAR

In a market where "portable modular" has become a meaningless buzzword, Looboo is setting a new standard. We deliver displays that combine the simplicity and ease of a portable with the impactful presentation of a custom exhibit.

Experience the ultimate in display versatility with Looboo. Our modular system lets you create anything from small, local event displays to large, multimedia trade show exhibits.

Refined Presentation

Looboo is a portable display that offers substance and refinement to create a positive, memorable impression for your brand. The stable and impressive load-bearing Looboo backdrop is available in varied heights. Exhibitors can customize their display by adding beautiful graphics, larger monitors, shelves, and other accessories to create an attractive, yet purposeful presentation.

Project Flexibility

When you purchase the Looboo Modular Display system, you're buying more than a singular exhibit; you're acquiring a set of components that allow you to execute marketing projects that require anything from a simple stand-up banner to a full island trade show exhibit.

Simple Setup

Setting up and packing Looboo is simple enough for just about anyone to understand. As an exhibitor, Looboo gives you the ability to handle your own installation or the confidence to supervise installation and dismantle staff. The system features only a handful of standard components, and packing is made simple with our Mini-Crate and unique packing modules.

Lower Operating Costs

Shipping, material handling, and storage costs are more than 50% less than comparable modular and custom exhibits that require large, full-size crates. Looboo can be packed in either wheeled bags or our collapsible Mini-Crate. Exhibitors can save thousands of dollars on a per event basis.
